

# Windowpane Poncho

*Designed by Denise Renee Grace*

**Difficulty Level:** Easy

**Equipment:** 20” Flip loom with an 8-dent reed, tapestry needle for sewing.

**Warp yarn:** Arbor from Brooklyn Tweed. DK weight in “Cobbler” 2.8 skeins, 145 yards per skein – 408 yards total.

**Weft Yarn:** Arbor from Brooklyn Tweed, DK weight in “Cobbler” 1.2 skeins, 145 yards per skein – 174 yards total.

Quarry from Brooklyn Tweed Bulky weight in “Sulphur” 1 skein, 200 yards per skein.

**Warp length:** 92” which includes take-up and loom waste.

**Width in reed:** 20”

**EPI:** 8

**Total warp ends:** 160

**PPI:** 6-8, this may need adjusting since you are using two weights of yarn.

**Weaving:** Hemstitch at the beginning.

*Continued on back*

Weave plain weave through out. Weave Arbor for 1" then, alternate between Arbor and Quarry every other pick. Be sure to weave a balanced plain weave so the picks of Quarry look square. Weave to the end of your warp, ending with 1" of Arbor like in the beginning. Hemstitch at the end.

**Step 1**

**Step 2**

**Assembly:** Lay length of fabric down in a straight line. Bring one end down to a point. Bring the other end to a point overlapping the other end. With a 10 yard length of arbor, sew a square with a whip stitch where these points overlap.

**Finishing:** Hand wash, dry flat. Once dry, put in the dryer on medium heat for about 10 minutes until sufficiently fluffed, checking often.
