UNIVERSAL WOLF TRAP BRACKETS

A few years ago, we changed the Wolf Loom beams from round to square. We then changed the Wolf Trap brackets to fit the new square beam and introduced a second Wolf Trap for the older round beams. Now we've come up with a better idea! The new bracket fits both styles of beams, eliminating the ordering and fit problems. The assembly manual for the redesigned trap indicates that it fits all Wolf Looms.

MSRP \$52.00

FL3831 BABY WOLF TRAP—
MSRP \$62.00

FL3832 MIGHTY WOLF TRAP—
MSRP \$66.00

NIDDY NODDY UPDATE

We've replaced the grip and the locking mechanism on the shaft of the niddy noddy! You'll now find a softer foam grip on the bar, instead of a rubber one. Our new "tent-peg" locking system makes it easier to open and close the niddy noddy. It's similar to the push-button you'd see on an umbrella: push the button, slide the bars, and you're done.

You'll see this change on niddy noddies shipping after August 10, 2018. The product numbers and prices are the same.

MAPLE—MSRP \$81.00

WS6908C NIDDY NODDY
CHERRY—MSRP \$83.00

STANDARD FLOOR LOOM CHANGE

We have discontinued the 10-treadle option for the 45" Standard Floor Loom. Now we just offer the 45" Standard Floor Loom with 12 treadles. These product numbers are no longer active:

FL3309	FL3311
FL3313	FL3315
FL3321	FL3323
FL3325	FL3327

FLIP LOOM SHUTTLE CHANGE

Beginning in August, Flip looms will come with longer stick shuttles. At the request of a dealer, we are now including shuttles that match the Flip's weaving width as closely as possible. What will now be included: 16" stick shuttle with 15" loom, 20" stick shuttle with 20" loom, 24" stick shuttle with 25" loom, and 30" stick shuttle with 30" loom.

WINDING STATION CHANGE

We have simplified our winding station by removing the extension arm. Customers weren't using it, and now the station has a useful flat shelf. The price and the product number haven't changed.

MSRP \$313.00

IN THE KNOW

EASY HEDDLES

We think every inkle or tapestry loom should be sold with a package of 8-5/8" Texsolv heddles. They are the perfect size for folding over the warp threads and hooking under the heddle bar. Your customers will never have to tie heddles again. Strong Texsolv heddles are the perfect length and can be used again and again.
