

VARIABLE DENT REEDS

For Cricket and Flip Looms

Create fabric with different densities in the sett, or accommodate thick and thin yarns.

NOTES

- It is easiest to set up the variable dent reed at your loom.
- The weaving width of the variable dent reed is about 1/4" narrower than a regular reed of similar width.
- To weave at full width, you may need to remove the plastic spacers from the frame posts prior to re-assembly.
- Reed sections do not need to completely fill all of the available space in the reed frame. To weave at less than full width, secure reed sections with heddle retainer rings.

ASSEMBLY

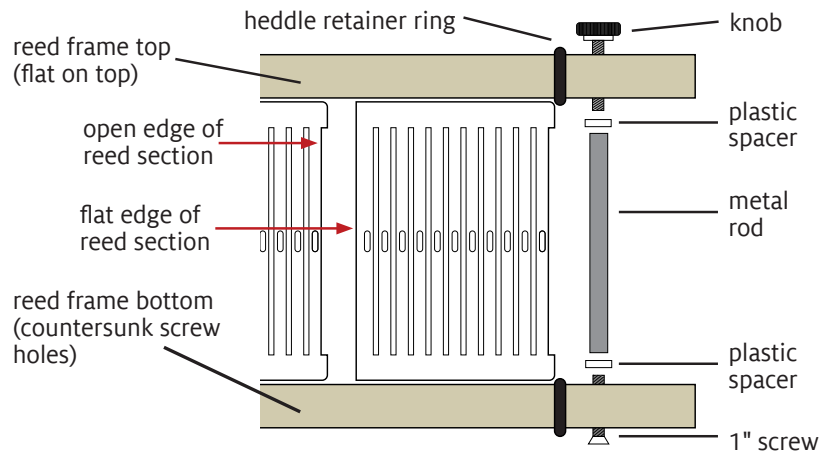

- Disassemble the entire reed frame and place the reed frame bottom in the loom's up heddle position with the slot facing up.
- Insert the reed sections in your desired order, with the open edge of one section meeting the flat edge of the next section and that the reed sections are centered in the reed frame.
- Place the reed frame top over the reed sections with the slot facing down.
- For weaving at less than full width, secure the reed sections with heddle retainer rings: slide a ring onto both the top and bottom frames until they rest against the outermost reed sections, holding the sections in place.
- Re-assemble end posts: insert a 1" screw through the frame bottom, a plastic spacer, and the metal rod. Then insert the knob through the reed frame top, a plastic spacer, and into the metal rod. Tighten the knob on the frame top; you may need to hold the screw in place with a screwdriver or your finger.

HARDWARE INCLUDED

- 2X knobs
- 2X 1" screws
- 2X metal rods
- 4X plastic spacers
- 4X heddle retainer rings

TOOLS NEEDED

- #2 Philips screwdriver

SL2160 10" VARIABLE DENT REED FOR CRICKET LOOMS

10" reed frame holds up to 4 sections

Included reed sections:

- 2X 5 dent
- 2X 8 dent
- 2X 10 dent
- 2X 12 dent

SL2161 15" VARIABLE DENT REED FOR CRICKET & FLIP LOOMS

15" reed frame holds up to 6 sections

Included reed sections:

- 4X 5 dent
- 4X 8 dent
- 3X 10 dent
- 3X 12 dent

SL2162 20" VARIABLE DENT REED FOR FLIP LOOMS

20" reed frame holds up to 8 sections

Included reed sections:

- 6X 5 dent
- 4X 8 dent
- 4X 10 dent
- 4X 12 dent

SL2163 25" VARIABLE DENT REED FOR FLIP LOOMS

25" reed frame holds up to 10 sections

Included reed sections:

- 8X 5 dent
- 8X 8 dent
- 5X 10 dent
- 5X 12 dent

SL2164 30" VARIABLE DENT REED FOR FLIP LOOMS

30" reed frame holds up to 12 sections

Included reed sections:

- 9X 5 dent
- 9X 8 dent
- 6X 10 dent
- 6X 12 dent
